

Secure-Corp Data Handling Policy v1.0

1. All Engineers must use Multi-Factor Authentication (MFA).
2. Production Data must be encrypted at rest using AES-256.
3. The CTO is responsible for approving all Cloud Budgets.
4. Customer PII (Personally Identifiable Information) must never be stored in logs.
5. If a Data Breach occurs, the Security Team must be notified within 1 hour.
